

World Otter Day

29 May 2019

Help us to help the world's otters.

Creating awareness of otters and the importance of their conservation.

Conservation

Protecting

Why are otters so important? Not only are they wonderful to watch but they are great indicators to a healthy environment, which is important for all species, including our own.

Education

Research

International

12 of the 13 species worldwide are declining because of hunting for the illegal fur trade, habitat destruction, reduction in available prey, and road deaths.

Rehabilitation

Caring

We need YOU to help us to tell others about this and get them involved.
